SKILL & PROJECT

Android Studio, HTML, XML(Layout Desing), Kotlin, MS Word, MS Excel, MS PowerPoint.

PROJECTS :

Project 1 : Academy Hub: College Management Application

- **Tech Stack:** Kotlin, XML (Material 3), Firebase (Firestore, Authentication, Cloud Functions).
- **Description**: A robust educational platform designed to streamline communication and management between administrators, faculty, and students.

Key Features:

- **OTP-Based Authentication:** Implemented secure user login and registration using Firebase OTP.
- **Role-Based Access Control (RBAC):** Distinct interfaces and permissions for Admins, Teachers, and Students.
- **Data Management:** Real-time tracking of student enrollment, course allocation, timetables, and exam schedules using Firebase Firestore**.**
- **Key Modules:** Developed modules for Fee management, Attendance tracking, and Result announcements**.**
- **User Experience:** Designed using modern Material 3 components for a professional and intuitive UI.

Project 2 : House Booking: Mobile Application (Advance Version)

- **Tech Stack:** Kotlin, XML (Material 3),
  Firebase (Firestore & Authentication).
- **Description:** An advanced Android application for real-time property booking with cloud-based data management and secure user access.

Key Features:

- **Cloud Integration:** Used Firebase Firestore for real-time property updates and data storage.
- **Secure Authentication:** Integrated Firebase Auth for secure user login and registration**.**
- **Modern UI:** Developed using Material 3 guidelines for a professional and smooth user experience.
- **Role-Based Access**: Managed property listings, booking tracks, and customer feedback efficiently.

Project 3 : Online House Booking (Android Application)

- **Front End:** Kotlin, XML (Material UI)
- **Back End:** SQLite (via SQLiteOpenHelper)
- **Description:** Developed a standalone Android application for browsing and booking properties, designed to work efficiently offline using local database storage.

Key Features:

- User Registration and Login management using **SQLite**.
- Property listings including apartments and villas with high-quality images and details.
- Search and Filter functionality to find properties based on budget and category.
- Local data management to store user preferences and booking history securely on the device.
